I had purchased the Beetle book of Eastern North America and it was wonderful and large enough print to read. I did not notice that the Caterpillar book of eastern North America had “field guide” in small print. It was by the same publisher, so I assumed it would be a large book with print that was legible!!

A caterpillar is the larval stage of a moth or butterfly. It is the second part of their four-stage life cycle (egg, larva, pupa, adult). Caterpillars have long, worm-like bodies with six true legs. They can also have a variable number of stumpy false legs (called prolegs), which help them to move and cling to things.
