Designing the organization of the future is a difficult, sometimes messy project of trial and error, not an exercise on paper. It is a continuous, dynamic, and, in a sense, never-ending process. Yet for companies that rise to the challenge, the payoff can be immense in terms of financial performance, productivity, employee engagement, and a host of other benefits.

The organization of the future | Deloitte Insights

Historically, too much IT security spending has focused on the prevention of attacks and not enough has gone towards preparing for the inevitable. A comprehensive incident response plan will enable your organization to respond aggressively to an attack, minimize damage and align defenses to mitigate future intrusions.
