Summary Of High Output Management

Andy's formula for high output management is:

A manager's output =
The output of his
organization + The
output of the
neighboring
organizations under his
influence . The
principle is that a
manager's output
should not be focused
on how much work he
is able to produce, it

Access Free Summary Of High Output

should be measured on how much output his organization (team) and any neighboring team he influences outputs.
