First, the brain of the MINDSTORMS robot is NXT, an intelligent, computer-controlled LEGO brick that features a 32-bit microprocessor, a large matrix display, input and output ports, and a speaker. Second, three Interactive Servo Motors give you precise control over the robot and ensure that the robot moves with precision - the built-in rotation sensor can measure one-degree steps.

The NXT software for the Education version of the NXT is sold separately here at LEGO Education and contains different help material and building instructions from the retail version of the software, although either version of the software can be used to write programs for either NXT kit. For the NXT 2.0 projects on this site, the LEGO ...

NXT Required Software - Lego Mindstorms NXT

The Sound Sensor can measure sound pressure levels up to 90 dB – about the level of a lawnmower. Sound pressure levels are extremely complicated, so the Sound Sensor readings on the MINDSTORMS NXT are displayed in percent [%]. The lower the percent the quieter the sound. For example: 4-5% is like a silent living room
