Aquatic exercise, in a general sense, is any type of movement performed in the water for the purpose of improving health and fitness. Water, with its properties, provides buoyancy to lighten the “load” of pregnancy, hydrostatic pressure to alleviate pregnancy-induced edema, and many other benefits.

Aquatic Exercise and Thermoregulation in Pregnancy ...

K.C. Mendoza, J.D. Griffin, in Encyclopedia of Behavioral Neuroscience, 2010. Thermoregulation is a dynamic, homeostatic interaction between an organism's internal processes and its external environment, to maintain a stable, physiological temperature. Among mammals, thermoregulatory heat loss behavior includes vasodilation, panting, and sweating, while heat production behavior involves ...
